

Standard Features

- » Morehouse Washer Load Cell Adapters have been designed to eliminate misalignment and other parasitic errors during compression calibration of washer load cells.
- » Each set includes a base adapter, top alignment fixture, and an optional alignment plug for the base adapter.
- » Adapters help maintain the force application line aligned with the loading line of the load cell.
- » Top Alignment Fixture made to the specific bore size on each washer load cell.
- » Improve calibration results by providing more repeatable measurements.
- » Lowers overall calibration time by facilitating easier and faster setup.
- » Rust-resistant black oxide coating on all adapters.

List of Instruments to Calibrate

Instruments which can be calibrated with the adapters and corresponding part numbers

Calibration Adapters Assembly Number Based on Washer Load Cell Model

Manufacturer	Instrument Model No.	Capacity (lbf)	Adapter Assembly	Base Part No.	Ball Alignment Part No.
